Subject Index to Volume 13

A

Acetylcholine and L-glutamate mobilise Ca^{2+} from the same intracellular pool in cerebellar granule cells using transduction mechanisms with different Ca^{2+} sensitivities, 293
Adenylyl cyclase activity in plasma membranes derived from neural and non-neural cells, effects of Ca^{2+} and calmodulin on, 107
Adrenal chromaffin cells (bovine), presence of Na^{+}/Ca^{2+} exchange activity and its role in regulation of intracellular calcium concentration in, 99
Adrenergic (beta) effects on cellular Na, Mg, Ca, K and Cl in vascular smooth muscle: Electron probe analysis of rabbit pulmonary artery, 593
Alkanols on Ca^{2+} transport in brain mitochondria, effect of, 41
Aluminium lactate, Ehrlich tumour cells: Ca^{2+}-uptake modification by, 277
Aortic endothelial cells (isolated bovine), Intracellular calcium 'signatures' evoked by different agonists in, 227
Arachidonic acid, lysophospholipids and other fatty acids on regulation of Ca^{2+} transport in permeabilized pancreatic islets, effects of, 193
Arachidonic acid on insulin secretion, calmodulin-dependent protein kinase activity and protein kinase C activity in pancreatic islets, parallel effects of, 163
Axonal transport (fast) is modulated by altering trans-axolemmal calcium flux, 249

B

Bradykinin-induced extracellular calcium-dependent and -independent increases in osteoblast-like MC3T3-E1 cells, different protein kinase C isozymes could modulate, 329
Brain mitochondria, effect of alkanols on Ca^{2+} transport in, 41
Buffering of calcium in the vicinity of a channel pore, 183

C

Ca^{2+} from sequestered intracellular pools is not the primary transduction mechanism causing the initial burst of PRL and TSH secretion induced by TRH in normal rat pituitary cells, an acute release of, 173
Ca^{2+}/calmodulin-regulated nitric oxide synthases, 427
Calcium pump isoforms: Diversity, selectivity and plasticity – REVIEW ARTICLE, 9
Calcium responses in normal and cancerous mammary cells, mechanically induced electrical and intracellular, 501
Calcium-binding proteins, Novel: Fundamentals and Clinical Implications – BOOK REVIEW, 77
Calmodulin (yeast): Structural and functional elements essential for the cell cycle, 445
Calmodulin – to helix or not to helix, the linker of, 363
Calmodulin and Ca^{2+} on adenylyl cyclase activity in plasma membranes derived from neural and non-neural cells, effect of, 107
Calmodulin and calmodulin-related genes, regulation of expression of, by environmental stimuli in plants, 457
Calmodulin and its complex with a myosin light chain kinase fragment, solution structures of, 391
Calmodulin and its complexes with synthetic peptides based on target enzyme binding domains, the solution structures of, 377
Calmodulin and plasma membrane Ca^{2+} pump, solitary calcium spike dependent on, 581
Calmodulin, calcium and, 355
CALMODULIN FIELD, NEW DEVELOPMENTS IN THE: Collected Papers and Reviews, 353–472
Calmodulin, mutational analysis of, in *Saccharomyces cerevisiae*, 435
Calmodulin orchestrates membrane responses to stimuli in vivo in *Paramecium* mutants, 413
Calmodulin pathways in the cell functions, molecular pharmacology of, 465
Calmodulin-dependent protein kinase activity, protein ki-

nase C activity and insulin secretion in pancreatic islets, parallel effects of arachidonic acid on, 163
Calmodulin/Ca^{2+}-regulated nitric oxide synthases, 427
CaM kinase, decoding calcium signals by multifunctional, 401
Cancerous mammary and normal cells, mechanically induced electrical and intracellular calcium responses in, 501
Cerebellar granule cells, L-glutamate and acetylcholine mobilise Ca^{2+} from the same intracellular pool in, using transduction mechanisms with different Ca^{2+} sensitivities, 293
Channel pore, buffering of calcium in the vicinity of a, 183
Channels (L-type calcium) of guinea pig cardiomyocytes in cell-attached patches are stimulated by thrombin, but not after intracellular dialysis, 203
Concanavalin A induced alterations in cytoplasmic free calcium in rat spleen cells as determined with Fluo–3, the effect of endotoxemia on, 123
Confocal microscopy, evaluation using, Subcellular distribution of cytosolic Ca^{2+} in isolated rat hepatocyte couplets, 89
Cytochrome P-450 inhibitors, influx of calcium evoked by Ca^{2+} store depletion in human platelets is more susceptible to, than receptor-mediated calcium entry, 553
Cytosolic Ca^{2+} in isolated rat hepatocyte couplets: Evaluation using confocal microscopy, subcellular distribution of, 89
Cytosolic calcium and oxygen consumption in isolated rat hearts, relationship between, 235

D

Dihydropyridine binding, testosterone sensitive, in the Harderian gland of the male hamster, 565
Dimethyl sulfoxide, inhibition of the human erythrocyte calcium pump by, 659
Divalent ions, evaluation of platelet calcium ion mobilization by the use of various, 19

E

Ehrlich tumour cells: Ca^{2+}-uptake modification by aluminium lactate, 277
Electron probe analysis of rabbit pulmonary artery: beta-adrenergic effects on cellular Na, Mg, Ca, K and Cl in vascular smooth muscle, 593
Endotoxemia on concanavalin A induced alterations in cytoplasmic free calcium in rat spleen cells as determined with Fluo–3, The effect of, 123
Enzyme binding domains (target), the solution structures of calmodulin and its complexes with synthetic peptides based on, 377
Erythrocyte calcium homeostasis in favism, mechanisms of perturbation of, 649
Erythrocyte calcium pump by dimethyl sulfoxide, Inhibition of the human, 659

F

Favism, mechanisms of perturbation of erythrocyte calcium homeostasis in favism, 649
Fibroblasts (murine), interaction between mitogens upon intracellular Ca^{2+} pools in murine fibroblasts, 603
Fluo–3 to determine the effect of endotoxemia on concanavalin A induced alterations in cytoplasmic free calcium in rat spleen cells, 123
Fluorescence lifetime imaging of calcium using Quin–2, 131
Fluorescent calcium indicators, effects of photolabile calcium chelators on, 29
Fluxes (calcium) in cells, new views on their significance: EDITORIAL, 273
FMLP-insensitive calcium pools in human leukocytes, thapsigargin reveals evidence for, 487
Fura–2 and a modified image processing system — applications in studies of neutrophil motility and phagocytosis, a novel principle for quantitation of fast intracellular calcium changes using, 473
Fura–2 fluorescence, spectral characterization of the effect of viscosity on: Excitation wavelength optimization abolishes the viscosity artifact, 313

G

Glucose sensing of individual pancreatic β-cells involves transitions between steady-state and oscillatory cytoplasmic Ca^{2+}, 219
Glutamate and acetylcholine mobilise Ca^{2+} from the same intracellular pool in cerebellar granule cells using transduction mechanisms with different Ca^{2+} sensitivities, 293
GnRHs (two native) and protein kinase C modulators on goldfish pituitary cells, actions of. Studies on intracellular calcium levels and gonadotropin release, 531
Gonadotropin-releasing hormone, transient but not oscillating component of the calcium mobilizing response to, depends on calcium influx in pituitary gonadotrophs, 521
Granulosa cells (chicken), thapsigargin increases cytoplasmic free Ca^{2+} without influencing steroidogenesis in, 263

H

Halothane and isoflurane on intracellular Ca^{2+} regulation in cultured cells with characteristics of vascular smooth muscle, the effects of, 513
Harderian gland of the male hamster, testosterone sensitive dihydropyridine binding in, 565
Heart cell (neonatal rat), cellular origin of the rapidly exchangeable calcium pool in the cultured, 627
Hearts (isolated rat), relationship between cytosolic calcium and oxygen consumption in, 235
HeLa cells, an intracellular calcium store regulates protein synthesis in, but it is not the hormone-sensitive store, 303
Hemolytic plaque assay (reverse), evidence that basal secretion of relaxin by individual cultured large luteal cells is influenced by mobilization of intracellular calcium, analysis by a, 571
Hepatocyte (rat) couplets : Evaluation using confocal micro-

scopy, Subcellular distribution of cytosolic Ca^+ in isolated, 89

I

Indo–1, non-calcium interactions of, microspectrofluorometry as a tool for investigation of, 59
Influx of calcium evoked by Ca^{2+} store depletion in human platelets is more susceptible to cytochrome P-450 inhibitors than receptor-mediated calcium entry, 553
Inositol 1,4,5-trisphosphate and phospholipids mass in Xenopus oocytes, insulin and progesterone increase $^{32}PO_4$-labeling of, 341
Inositol 1,4,5-trisphosphate and ryanodine binding sites in rat liver, different localization of, 79
Inositol(1,4,5)trisphosphate-sensitive calcium store content, modulation of, during continuous receptor activation and its effects on calcium entry, 541
Insulin and progesterone increase $^{32}PO_4$-labeling of phospholipids and inositol 1,4,5-trisphosphate mass in Xenopus oocytes, 341
Insulin secretion, calmodulin-dependent protein kinase activity and protein kinase C activity in, parallel effects of arachidonic acid on, 163
Insulinoma (glucose-responsive), Na^+/Ca^{2+} exchange in plasma membrane vesicles from, 1
Intracellular calcium 'signatures' evoked by different agonists in isolated bovine aortic endothelial cells, 227
Ionomycin produces an improved volume recovery by an increased efflux of taurine from hypoosmotically stressed molluscan red blood cells, 321
Isoflurane and halothane on intracellular Ca^{2+} regulation in cultured cells with characteristics of vascular smooth muscle, the effects of, 513

L

Leucocytes (human), thapsigargin reveals evidence for fMLP-insensitive calcium pools in human leukocytes, 487
Liver (rat), different localization of inositol 1,4,5-trisphosphate and ryanodine binding sites in, 79
Luteal cells (individual cultured large), evidence that basal secretion of relaxin by, is influenced by mobilization of intracellular calcium: Analysis by a reverse hemolytic plaque assay, 571
Lysophospholipids, arachidonic acid and other fatty acids on regulation of Ca^{2+} transport in permeabilized pancreatic islets, effects of, 193

M

Malignant hyperthermia, abnormalities in the regulation of blood platelet free cytosolic calcium in, I (human) & II (pig), 149, 157
Mating factor-activated Ca^{2+} influx, characterization of the energy-dependent, in Saccharomyces cerevisiae, 615
Mechanisms of activated Ca^{2+} entry in the rat pancreatoma cell line AR4-2J, 49
Microspectrofluorometry as a tool for investigation of non-calcium interactions of Indo–1, 59
Mitochondria (brain), effect of alkanols on Ca^{2+} transport in, 41
Mitochondria, interactions of calcium with yeast, 211
Mitogens, interaction between, upon intracellular Ca^{2+} pools in murine fibroblasts, 603
Molecular pharmacology of calmodulin pathways in the cell functions, 465
Myosin light chain kinase fragment, solution structures of calmodulin and its complex with a, 391

N

Neural and non-neural cells, effects of Ca^{2+} and calmodulin on adenylyl cyclase activity in plasma membranes derived from, 107
Neutrophil motility and phagocytosis, a novel principle for quantitation of fast intracellular calcium changes using Fura–2 and a modified image processing system — applications in studies of, 473
Nitric oxide synthases, Ca^{2+}/calmodulin-regulated, 427
Novel Calcium-Binding Proteins: Fundamentals and Clinical Implications – BOOK REVIEW, 77

O

Oocytes (Xenopus), insulin and progesterone increase $^{32}PO_4$-labeling of phospholipids and inositol 1,4,5-trisphosphate mass in, 341
Oscillatory cytoplasmic Ca^{2+}, glucose sensing of individual pancreatic β-cells involves transitions between steady-state and, 219
Osteoblast-like MC3T3-E1 cells, protein kinase C isozymes (different) could modulate bradykinin-induced extracellular calcium-dependent and -independent increases in, 329
Oxygen consumption and cytosolic calcium in isolated rat hearts, relationship between, 235

P

Pancreatic (single) β-cells from normal rats exhibit an initial decrease and subsequent increase in cytosolic free Ca^{2+} in response to glucose, 69
Pancreatic β-cells, glucose sensing of individual, involves transitions between steady-state and oscillatory cytoplasmic Ca^{2+}, 219
Pancreatic islets (permeabilized), effect of lysophospholipids, arachidonic acid and other fatty acids on regulation of Ca^{2+} transport in, 193
Pancreatic islets, parallel effects of arachidonic acid on insulin secretion, calmodulin-dependent protein kinase activity and protein kinase C activity in, 163
Pancreatoma cell line AR4-2J, mechanisms of activated Ca^{2+} entry in the rat, 49
Paramecium mutants (in vivo) show that calmodulin orchestrates membrane responses to stimuli, 413
Phagocytosis and neutrophil motility, a novel principle for quantitation of fast intracellular calcium changes using Fura–2 and a modified image processing system — applications in studies of, 473
Phospholipids and inositol 1,4,5-trisphosphate mass in Xenopus oocytes, insulin and progesterone increase $^{32}PO_4$-labeling of, 341

Photolabile calcium chelators on fluorescent calcium indicators, Effects of, 29
Pituitary gonadotrophs, transient but not oscillating component of the calcium mobilizing response to gonadotropin-releasing hormone depends on calcium influx in, 521
Plasma membrane Ca^{2+} pump and calmodulin, solitary calcium spike dependent on, 581
Platelet calcium ion mobilization by the use of various divalent ions, evaluation of, 19
Platelets (human & pig), abnormalities in the regulation of blood platelet free cytosolic calcium in malignant hyperthermia. I & II, 149, 157
Platelets (human), calcium influx evoked by Ca^{2+} store depletion in, is more susceptible to cytochrome P-450 inhibitors than receptor-mediated calcium entry, 553
Preface: NEW DEVELOPMENTS IN THE CALMODULIN FIELD, 353
PRL and TSH secretion induced by TRH in normal rat pituitary cells, an acute release of Ca^{2+} from sequestered intracellular pools is not the primary transduction mechanism causing the initial burst of, 173
Progesterone and insulin increase $^{32}PO_4$-labeling of phospholipids and inositol 1,4,5-trisphosphate mass in Xenopus oocytes, 341
Protein kinase C activity, insulin secretion, calmodulin-dependent protein kinase activity in pancreatic islets, parallel effects of arachidonic acid on, 163
Protein kinase C and two native GnRHs modulators on goldfish pituitary cells, actions of. Studies on intracellular calcium levels and gonadotropin release, 531
Protein kinase C isozymes (different) could modulate bradykinin-induced extracellular calcium-dependent and -independent increases in osteoblast-like MC3T3-E1 cells, 329
Protein synthesis in HeLa cells regulated by an intracellular calcium store, but it is not the hormone-sensitive store, 303
Pump (calcium) isoforms : diversity, selectivity and plasticity : REVIEW ARTICLE, 9

Q

Quin–2 used in fluorescence lifetime imaging of calcium, 131

R

Red blood cells (molluscan), ionomycin produces an improved volume recovery by an increased efflux of taurine from hypoosmotically stressed, 321
Relaxin, evidence that basal secretion of, by individual cultured large luteal cells is influenced by mobilization of intracellular calcium: Analysis by a reverse hemolytic plaque assay, 571
Ryanodine and inositol 1,4,5-trisphosphate binding sites in rat liver, different localization of, 79
Ryanodine-affinity chromatography purifies 106 kD Ca^{2+} release channels from skeletal and cardiac sarcoplasmic reticulum, 635

S

Saccharomyces cerevisiae, characterization of the energy-dependent, mating factor-activated Ca^{2+} influx in, 615
Saccharomyces cerevisiae, Mutational analysis of calmodulin in, 435
Sarcoplasmic reticulum, ryanodine-affinity chromatography purifies 106 kD Ca^{2+} release channels from skeletal and cardiac, 635
Sodium/calcium (Na^+/Ca^{2+}) exchange activity and its role in regulation of intracellular calcium concentration in bovine adrenal chromaffin cells, Presence of, 99
Sodium/calcium (Na^+/Ca^{2+}) exchange in plasma membrane vesicles from a glucose-responsive insulinoma, 1
Spectral characterization of the effect of viscosity on Fura–2 fluorescence
Excitation wavelength optimization abolishes the viscosity artifact, 313
Spleen (rat) cells as determined with Fluo–3, effect of endotoxemia on concanavalin A induced alterations in cytoplasmic free calcium in, 123

T

Taurine (increased efflux of) from hypoosmotically stressed molluscan red blood cells, ionomycin produces an improved volume recovery by an, 321
Testosterone sensitive dihydropyridine binding in the Harderian gland of the male hamster, 565
Thapsigargin increases cytoplasmic free Ca^{2+} without influencing steroidogenesis in chicken granulosa cells, 263
Thapsigargin on cardiac muscle cells, Effect of, 281
Thapsigargin reveals evidence for fMLP-insensitive calcium pools in human leukocytes, 487
Thrombin stimulates L-type calcium channels of guinea pig cardiomyocytes in cell-attached patches but not after intracellular dialysis, 203
TRH induced acute release Ca^{2+} from sequestered intracellular pools is not the primary transduction mechanism causing the initial burst of PRL and TSH secretion (in normal rat pituitary cells), 173
TSH and PRL secretion induced by TRH in normal rat pituitary cells, an acute release of Ca^{2+} from sequestered intracellular pools is not the primary transduction mechanism causing the initial burst of, 173

V

Vascular smooth muscle, beta-adrenergic effects on cellular Na, Mg, Ca, K and Cl in : Electron probe analysis of rabbit pulmonary artery, 593
Vascular smooth muscle, the effects of halothane and isoflurane on intracellular Ca^{2+} regulation in cultured cells with characteristics of, 513
Viscosity on Fura–2 fluorescence, effects on
Excitation wavelength optimization abolishes the viscosity artifact, 313
